SURFsara's HPC Cloud **service**

1

What do we (SURFsara) want to offer?

Services for scientists

…scientists ≠ systems gurus

… complex users' problems

- **Data**: big, dirty, non-structured…
- **Computation**: complex (e.g.: modeling, simulation)
  - Libraries nightmare
    - 3rd party, incompatibility, maintenance…

Familiar?

… cooperate

… share

… trial and error

… show

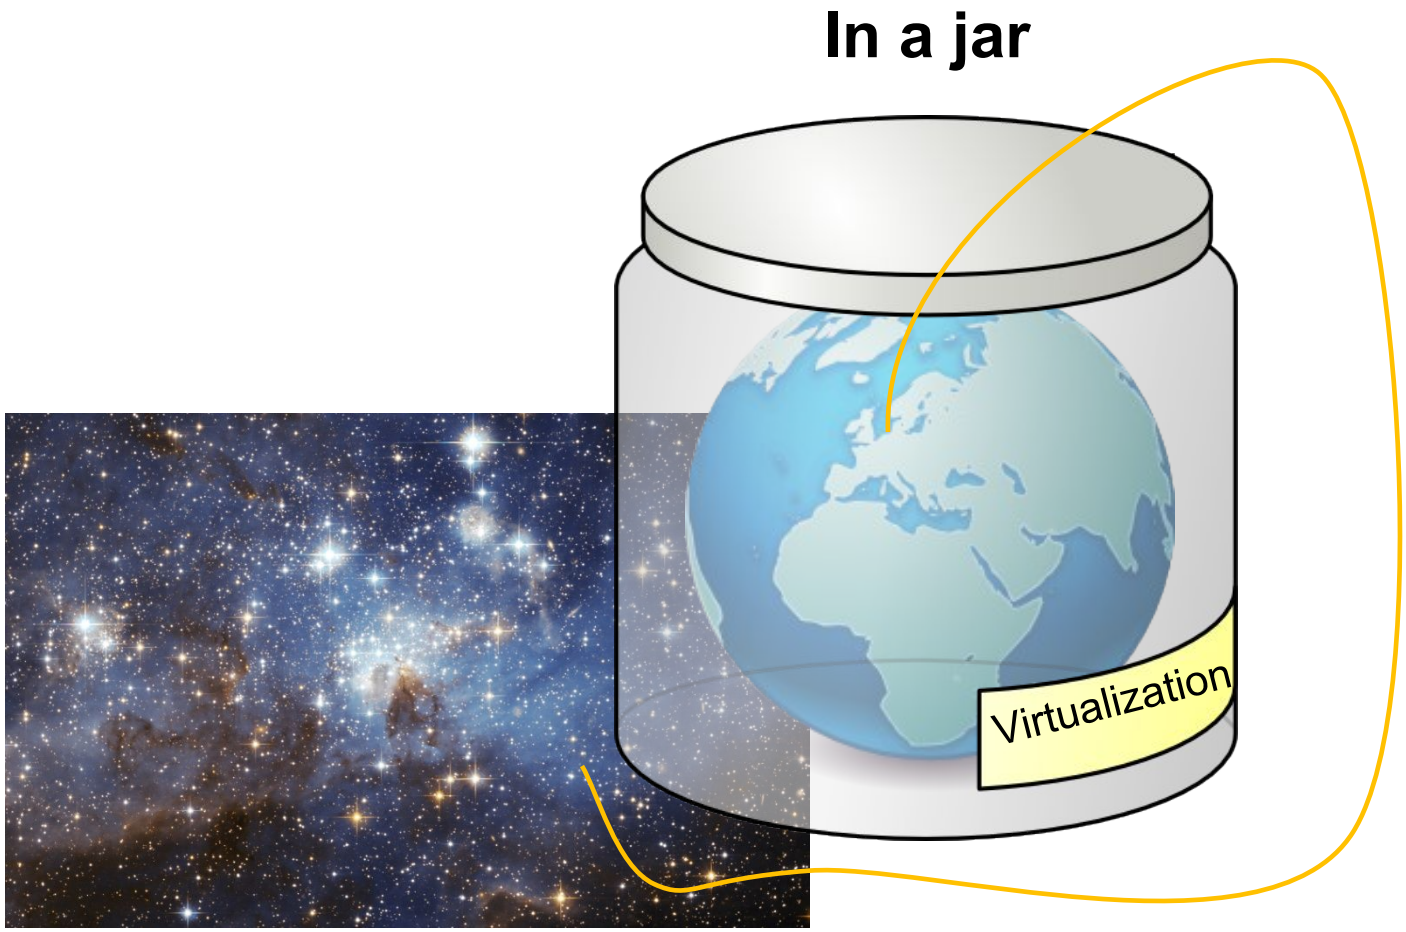
… test

… scratch

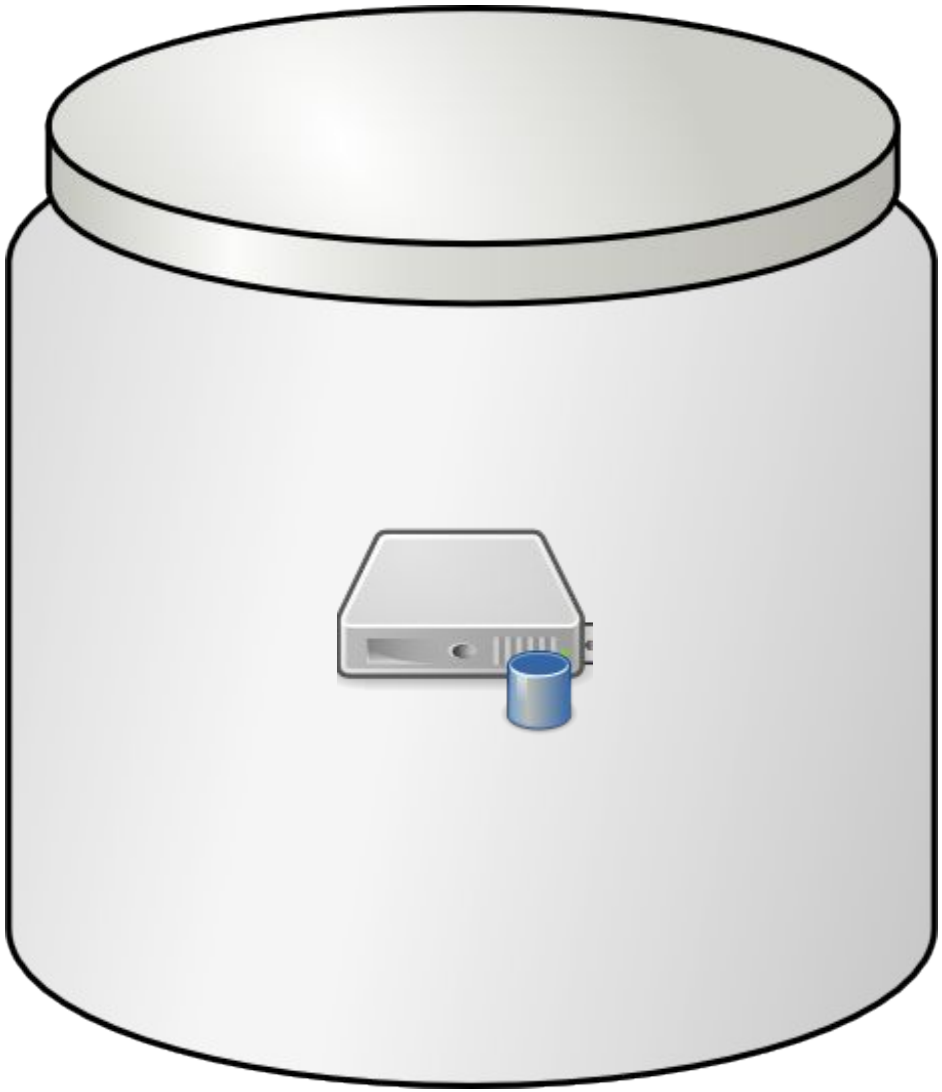
… flexibility

… privacy

What does our HPC Cloud offer?



What do you see, as a user?

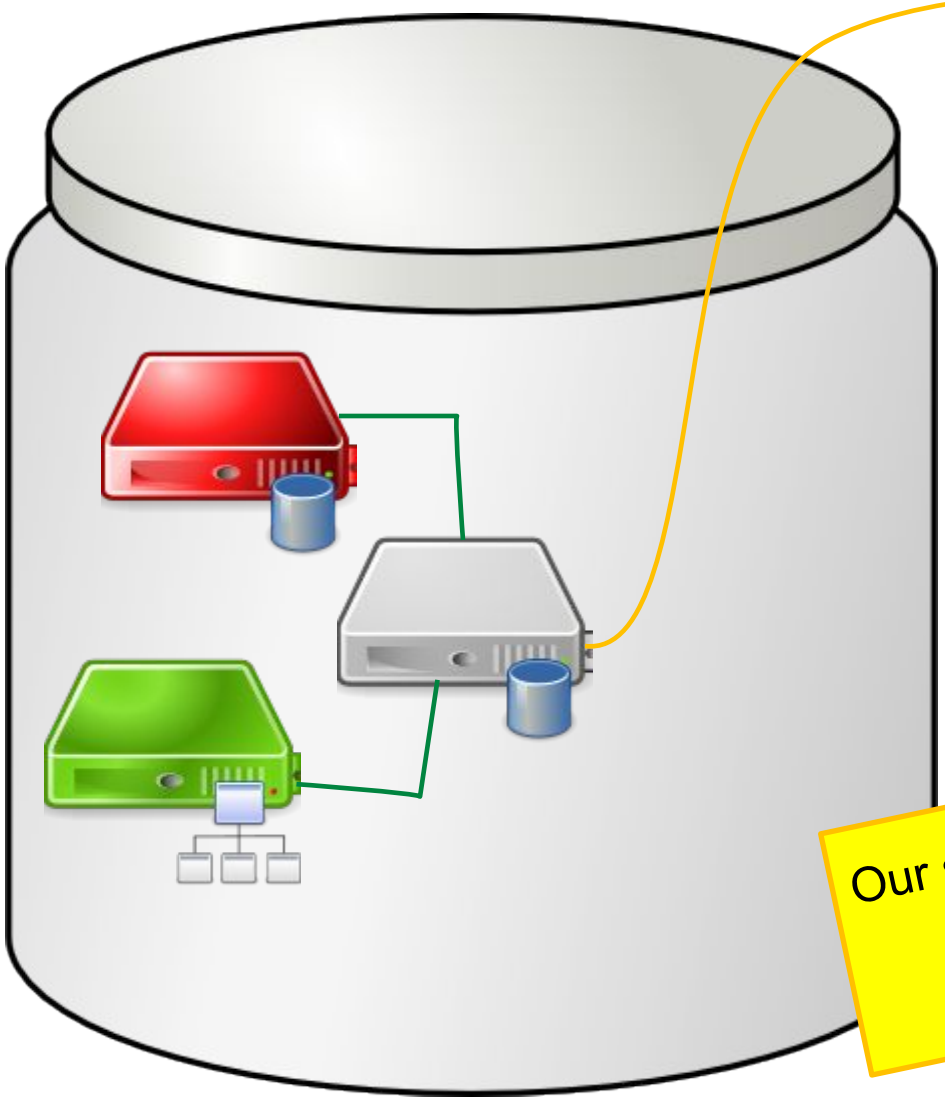


A place to build a running system

Build your own (virtual) machine:

- Hardware
  - CPU
  - Memory
  - Input/Output
    - Disk
    - Network interfaces
- Software
  - Operating System
  - Programs
  - Libraries

What do you see, as a user? (and II)



A place to build a bunch of systems

Build your own cluster:

- Private network
- Internet access
